

About

Who is Building your Coach?

Create a Coach of your dreams!

Here at Custom Coach Creation we Pride ourselves on building high quality Coaches the old fashion way with real wood and some of the best products and appliances in the industry, like: Victron, Houghton, Battle Born, Fiamma, Contoure, GoPower and many other name brands.

Our Build team is like family and they create some of the most unique coaches on the planet!

When we say Custom, that's what we mean! Every piece is built by hand to fit your needs.

Nothing in our Coaches is pre-made and every Camper will have the heart of the owner built into it.

Hello, we are Robert and Lois Murphy, Owners of Custom Coach Creations, Inc.

We build high quality coaches at a reasonable price that are truly custom, no cheap particle board used or corners cut, We build them to be user friendly, systems are hidden but very accessible and can be maintained by user with little to no experience. This saves the user time & money going to expensive RV repair facilities. Because we are a small Company without loads of overhead and outsourcing, we can build them to be affordable. Just as important, we build our coaches custom, the WAY YOU WANT IT! We help design a layout that works for you, you choose the amenities, materials & colors. We create everything right here on site, including the upholstery. We pride ourselves in personalized attention to each customer. We can build as much or as little, as you like. We build quality coaches on any chassis, new or old. We are experienced in building Ram Promaster, Mercedes Sprinter, Ford Transit, Nissan NV, Trailers and more. We Love what we do! Please take the time to look through our website, to learn

about all of the options that we can incorporate into a cargo or high top conversion van.
